*Environmental Class IV - Outdoor - General (-25^o to +60^oC)
according to EN 50131-1*

Complies with the essential requirements of: 89/336/EC EMC Directive - Protection concerning electromagnetic compatibility when is used for its intended purpose. Original of the conformity assessment can be found at the web page www.jablotron.cz, section Technical support.

Installation

Remove plastic cover by removing two screws (under plastic caps) with a screwdriver.

Route all cabling into the siren through a hole in the rear part. Hang the siren housing on the top screw and fix it using two other screws.

Do not forget to switch the control panel to the service mode before you connect the cabling to the siren ! For maximum siren output use cables with sufficient cross section of wires.

+12V
GND

Operation

As long as the voltage is applied to the +12V input the siren sounds and flash light is active.

Note: *Although this product does not contain any harmful materials we suggest you to return the product to the dealer or directly to the producer after usage*
