**ACCREDITED TEST HOUSE - GSM, PCN, PCS, PTCRB, GCF, GPRS
NOTIFIED BODY / CERTIFICATION BODY**

CONFIRMATION

This is to confirm that Wavecom's customers can replace their Q2303 GSM module by a Q2403 GSM module without being required to repeat and/ or perform any additional GSM, EMC, Safety and health tests under the following conditions:

1. The original certified product having the Q2303 module integrated has been R&TTE certified.
2. This R&TTE certification was based on test reports and further documentation listing the test results of all applicable test cases for EMC, GSM, Safety and Health in accordance with the standards of the R&TTE Directive published in the Official Journal.
3. The Hardware and Hardware version of both product variations (with Q2403 module and Q2303 module integrated) are identical and unchanged. The only exception is the the GSM module itself (Q2303 or Q2403).
4. The MMI SW and MMI SW version of both product variations (with Q2403 module and Q2303 module integrated) are identical and unchanged.

Allocated IMEIs remain valid regardless the change of the GSM module (Q2403 and Q2303) and therefore it will not be required to apply for new IMEI blocks if the above listed conditions are satisfied.
